Portfolio: abebe-portfolio-smoky.vercel.app

PROFESSIONAL SUMMARY

Software Engineering graduate from Addis Ababa University, Addis Ababa Institute of Technology (AAiT), with hands-on experience in software development, IT support, and technical troubleshooting. Skilled in developing web applications, diagnosing hardware and software issues, and providing practical technical assistance. A clear communicator and collaborative team player with strong analytical thinking, adaptability, and a willingness to learn. Committed to accuracy, reliability, teamwork, and continuous improvement, with the ability to contribute across technical and operational functions in a professional environment. Available to start immediately.

KEY COMPETENCIES

- Analytical thinking and root-cause analysis
- Methodical, calm troubleshooting of software and hardware problems
- Clear communication with users and colleagues
- Teamwork and workflow coordination
- Attention to accuracy, reliability and quality
- Adaptability and willingness to learn

TECHNICAL SKILLS

Strongest in	**Java, Python, C, HTML, SCSS**
Programming	C# / .NET, JavaScript, TypeScript
Web development	HTML5, CSS3, SCSS, Angular, React, Tailwind CSS, REST APIs, responsive design
Databases	MySQL, Microsoft SQL Server, PostgreSQL, Supabase; SQL queries and schema design
Tools and deployment	Git and GitHub, Vercel, CI/CD pipelines, technical SEO
Security	Authentication, role-based access control, Row Level Security (RLS)
IT support	Hardware diagnosis, repair and maintenance; software and operating-system installation, configuration and troubleshooting; user support

PROFESSIONAL EXPERIENCE

Freelance IT and Software Support — Ongoing

Various businesses, Addis Ababa, Ethiopia (on-call basis)

- Provide on-call IT support to businesses, diagnosing and resolving software issues and troubleshooting computer hardware.
- Communicate with staff to verify that problems have been resolved.

IT Support Specialist — Until 2024

Swiss Diagnostics Ethiopia (Advanced Medical Diagnostics), Addis Ababa, Ethiopia

- Installed, configured and supported software, and contributed to developing and maintaining software used in daily operations.
- Diagnosed, repaired and maintained computers and related office hardware.
- Troubleshot software and operating-system problems using a methodical process: reproduced the issue, identified the root cause, applied a fix and tested to confirm it was resolved.
- Assisted users as a first point of contact for technical issues, communicating clearly with staff.
- Worked with colleagues to identify problems and implement practical solutions.
- Handled both software and hardware support within one role, giving colleagues a single technical point of contact.

PROJECTS

Abebe Property Hub - Real Estate Web Platform — Live and deployed

Developed independently | Live site: Abebe Property Hub

Overview: Real estate marketplace and administration platform for property discovery in Addis Ababa.

Technologies: React, TypeScript, Tailwind CSS, Supabase (PostgreSQL), Vercel, CI/CD, Schema.org.

Key features: Verified property listings, multi-level search filters, English and Amharic support, and secure role-based admin authentication with Row Level Security (RLS).

Outcome: Deployed to production with automated CI/CD on Vercel and indexed by Google through technical SEO and structured data.

Training Management System (TMS) - Full-Stack Web Application — Qiyas training project

Repositories: tms-client (Angular) | TmsApi (.NET)

Overview: Web system for managing training courses and trainees, with separate admin and trainee roles.

Technologies: Angular, .NET Web API (C#), PostgreSQL, REST APIs, Git and GitHub.

Key features: Secure login, role-based access, course management, trainee management and reporting.

Outcome: Delivered a working full-stack system as the project of the Qiyas full-stack training.

HealthBridge - Final Year Project — Team of 5

Role: contributed to frontend development (Angular and React) and helped organize the team's workflow

Overview: Platform that connects customers with pharmacies from the comfort of their home.

Technologies: Angular, React, HTML, SCSS, Git and GitHub.

Contribution: Contributed to the user-facing frontend, helped organize the team's workflow, and collaborated with four teammates using Git and GitHub.

Outcome: Completed as my final year project for the Software Engineering degree.

EDUCATION

Bachelor of Science in Software Engineering — Graduated 2025

Addis Ababa University, Addis Ababa Institute of Technology (AAiT), Addis Ababa, Ethiopia

Relevant coursework

- Object-Oriented Programming
- Data Structures and Algorithms
- Database Systems
- Software Engineering and Software Design
- Web Programming
- Operating Systems
- Computer Networks
- Software Testing and Quality Assurance

TRAINING AND CERTIFICATIONS

Microsoft Certified: Azure Fundamentals — 2024

Networking Basics - Cisco Networking Academy — 2024

Full-Stack Development Training - Qiyas — May - September 2026

Full Python Course - Orange Digital Center (ODC) — 2022/23

LANGUAGES AND REFERENCES

Languages: Amharic and English
